RE: EPA

Attached is a document that came to our attention today. It was produced by the EPA Office of Research and Development, which is responsible for the ETS risk assessment. It is not a public document or press release, we believe, but rather an internal instruction for EPA staff on how to respond to press inquiries flowing from the CBS Evening News story last week. Inasmuch as the document appears designed to stonewall the press, one should not attach too much significance to it.
